Full custom design product is available in compliance with the customer requirements including type, size, pure water cleaning required or not, core etc.

High performance Cleaning Cloth

# Toraysee® Roll

c l e a n i n g c l o t h

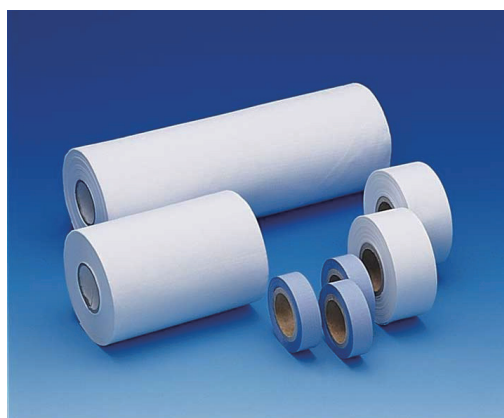

This Toraysee cleaning cloth slit into a roll is fit for automated cleaning use. Orders for various specifications in size, core, and others will be accepted separately.

## Special Specifications

Type	Cut width	Standard length	Roll outside diameter (Reference value)	Major characteristics				Recommended use
				Dry wiping	Absorbing rate	Fluid holding capacity	Dimension stability	
MK	10~1450 mm	40 M	150 mm	◎	○	◎	△	Wiping paste of high viscosity
MC	8~980mm	42 M	100 mm	△	△	△	◎	Roll cloth requiring compactness
PK	10~1500 mm	40 M	160 mm	○	◎	◎	△	Use requiring high absorbing rate
PW	10~1500 mm	50 M	135 mm	○	◎	○	○	Wiping fluid of low viscosity
ME	13~1450 mm	42 M	180 mm	×	△	◎	×	Use requiring no high wiping ability

※Inside diameter 25Φ core

## Example of product

## Example of core

For clean room use

Inside diameter 25Φ plastic core

For general environment use

Inside diameter 25Φ paper core

\* Any specification is acceptable according to customer system design. Please contact us.

\*1 Cloth for clean room use is packaged in a Class 100 clean room after ultra pure water cleaning. Cloth for general environment use is packaged in the general environment without ultra pure water cleaning. \*2 Data in this material are not guaranteed values but JIS values or our test results according to JIS.
